In these addresses an effort will be made to present the teaching of Christ touching man's relation to the material universe to his fellow man, to God, and to the future.

## Must instal Sewage Disposal System

According to the following clipping from the Calgary Albertan Didsbury will have to install a sewage system this year. Dr. Reid, the health inspector, has received no word yet from the Provincial Health Department but stated that he was expecting word any day in regard to the master. Following is the clipping.

Edmonton, Jan. 21st.—It has been made imperative by an important order just issued by the provincial board of health, that all municipalities in the province shall have proper and satisfactory sewage disposal systems installed before December 31st, 1910. The Order-in-Council, issued some time ago, which places the necessitating of the installation of such systems within the discretion of the provincial board, has been rescinded. The order includes packing plants and tanneries. Since the provincial board of health is committed to the septic tank system of sewage disposal, the new order means that all municipalities, packing plants and tanneries will have to install these tanks. It is to be hoped that the order will not be guilty of a violation of the statutes of the province. It practically necessitates the expenditure of close upon \$1,000,000.

The Comet Seen in Didsbury

A large number of Didsbury people saw the long looked for Halley's comet on Sunday night between 6.30 and 7 o'clock. The sky was dark, it was not as bright as it will be very plain. It is reported by the scientists that the earth will pass through its tail which is composed of the very lightest vapors. The same thing happened in 1862 but very few people knew anything of it.

SAYS IT IS NOT HALLEY'S

A despatch from New York states that the comet which has been seen here is not Halley's but one that astronomers know nothing about; that the two comets are pursuing an entirely different path and that this one is likely to be a far grander object even than Halley's.

## CONSERVE RESOURCES

THE CONSERVATION COMMITTEE  
MEET AT THE CAPITAL

Dr. Robertson, Speaking on "Conservation of Agricultural Resources," Expressed the Opinion that there was a Tendency for Men to Overwork the Land Without Thought of the Future.

OTTAWA.—At the first business meeting of the Canadian Association of Agriculture held here, Hon. Fred Cochrane of the Ontario government, who presided, called on Dr. Fernow, dean of the faculty of forestry in Toronto University, to speak on the subject.

Dealing with the subject of public ownership of forest lands, Dr. Fernow showed the wonderful success resulting from the control of timber lands by the state, controlled the lumber business.

It was suggested that a Royal commission be formed, or a committee be formed to look into these matters.

Dr. Robertson, speaking on "Conservation of Agricultural Resources,"

The Canadian Association in Canada and the United States were practically concurrent.

In the west there was a tendency for men to take what they needed from the land, get rich and let someone else pay the bill. Agriculture implied suppression of weeds, restraint of damaging diseases and preservation of beauty and fertility.

The address of Dr. P. H. Bryce, chief medical inspector of the department of the interior, was very popular because it was well understood.

In brief, the speaker emphasized the maintenance and the improvement of public health. His basic assumption was that science must keep the relation of a disease to a certain condition in a state of physical condition as a norm.

Dr. Bryce named several essential to public health—a better quality of food, better and more complete manipulation of our milk supply, better school inspection of children, rigorous methods to stop the pollution of rivers, more stringent sense of the tuberculosis problem and greater care to prevent railway and industrial accidents.

Provincial Elevators Demanded

Edmonton—A resolution was passed by the straight government delegation of elevators, both terminal and internal, and calling upon the provincial government to take over and operate the internal elevators. The motion was passed by the United Farmers' convention.

This precluded any possibility of the association favorably considering the proposal of the Free Workshop.

Vancouver—For the grain growers, a guarantee of an independent terminal elevator at the coast. Although the convention gave Mr. Robertson a proposal for a grain elevator, which he favored, the meeting was strongly in favor of absolute government ownership, and their stand was strengthened by an amendment to the resolution of an afternoon newspaper that the Manitoba government had granted the request of the grain growers of that province, and had decided to operate the elevators.

Whether the government will grant the demands of the resolution passed recently is doubtful. The feelings in the provincial legislature is that such a move on the ground that the western grain route would remedy the problem so far as Alberta elevators are concerned, and whether the government will yield to the voice of the association is a question.

The important announcement that a reorganization of the senate of the Alberta university, which will give farmers of the province would have representation in the senate, would take place shortly was made by Dr. T. G. Ross, president of the University at the biannual session in the city council to the convention of farmers.

## Oliver Introduces Immigration Bill

OTTAWA.—In the House of Commons Mr. Oliver introduced his immigration bill, which practically the same as the legislation which was presented last session by the minister, but which was dropped on account of the late-ness of the session. Mr. Oliver explained that the principles of the immigration act were not allowed by this bill, but it was deemed desirable to amend the legislation so as to perfect the method of operation, and to make it a reality along the 3,000 miles of international boundary. Last year's bill dealt chiefly with immigrants arriving at the western ports. The bill will deal more extensively with the large number of immigrants crossing the border between the United States and Canada.

The bill will also make more drastic the regulations already existing respecting the influx of Asiatics.

It also provides that a board of inquiry will sit and decide upon the merits of each case of reported undesirable immigrants. Once, however, the immigrant has passed the immigration board, he is in trouble with them, he must apply to the courts and put up a certain sum of money for expenses to prove he has the means to support himself. He cannot avail himself of the law, however, until he has passed the immigration authorities. The bill was given its first reading.

Eighty Families Coming

London—In connection with the Canadian Pacific school for settling families upon improved lands in western Canada, eighty families will sail shortly.

ALBERTA GRAIN SHIPPED WEST  
Only Five Per Cent. is Being Sent  
East According to Official  
Figures.

Calgary—Alberta grain is undoubtedly the most popular commodity to the west, according to the figures supplied by Mr. George Hill, the local grain inspector. Of the 1,620 cars of grain of last year's crop which have failed to date, not one per cent. has been consigned to eastern points, while in former years the very large bulk was shipped east and very little

While it is not definitely known that big orders are coming from Mexico, indications point that way. A large number of cars of grain have been sent by Calgary grain dealers to shippers in Mexico, and numerous shipments have been made as to the weighing and handling of the grain at the Pacific port.

The demand for spring wheat is very pronounced this year, while in former years winter wheat has been the demand. Of 1,620 cars of grain imported in Calgary for the first three weeks in January, but 63 have gone to eastern points.

The government taking over the elevators in the provinces has had the effect of making the elevator companies very cautious, and has compelled the companies to work to a certain extent. Affairs prevailed about two years ago when there was talk of government-owned elevators, but when the hurry was over the elevator companies commenced to build.

## Calgary to Have Another Great Fair

Calgary—A. G. Van Wart, president of the Calgary Exhibition and Stampede, has returned from interviewing the provincial government upon the question of a provincial exhibition. They obtained the consent of the government to hold a "provincial exhibition in the fall of this year." The question of an annual provincial show was not decided.

The question of money grant was held over. The exhibition officials further commented the work of organizing a best exhibition that Calgary has ever had.

It has already been decided to introduce many new features, and the exhibition will have more money in store for the promotion of the fair. A number of new buildings will have to be erected.

Mr. Richardson also received from the provincial government the assurance that the province would give the usual assistance to live stock organizations.

A Corn That Will Ripen in the West

Vancouver—One of the exhibits at the Fargo, North Dakota, corn show that has created great attention and surprise, was one sent from here by E. A. Farnsworth, who has been experimenting for five to six years to produce corn that would ripen here and be of commercial value.

Reports from Farnsworth say the exhibit holds the record for the earliest corn to be raised in the show room and has proved a decided feature of the exhibition demonstrating as it does to the satisfaction of the most discriminating judges that corn can be raised in western Canada.

This corn, raised in a country where would be expected to fail, just as any raised in Kansas or Missouri, said Prof. G. W. Randlett, promoter of the show, is the result of the best work in the field, and is another proof that the government will be tested extensively under the auspices of the Free Press this year in all the western prairie provinces.

## Will Not Eat Meat

Cleveland, O.—From an idle jest in the lunch room of a big lumberyards here, last week, the Cleveland strike against eating meat has grown to huge proportions.

One hundred thousand people in Cleveland have now pledged themselves to abstain from eating meat for the time being.

The Ohio legislature is the only state body so far to take up the question. A committee to investigate the cost of meat was appointed next week.

Locally, every minister in Ohio has taken in the movement. Loraine, New Philadelphia and Belfontaine, were added to the number.

Since the inception of the strike, meat has decreased in price, but further reduction is modified by the fact farmers have stopped their shipments into town. From this, it is inferred that Paul Fungus, the author of the bill, has been successful in his attempt against the eating of eggs until the price has dropped from 48c to 25c per dozen.

## Very Satisfactory Conference

Winnipeg—As a result of the conference between the ministers of the government and the members of the executive of the Grain Growers' Association, the government will take immediate steps to frame a bill to be presented at the next session of the legislature.

The bill will also last for two years, during which time the entire proposition of government ownership of elevators, as presented by the Grain Growers' Association, will be amicably discussed by clause.

When the bill is ready, but before it is submitted to the legislature, another conference will be held at which it will be presented to the Grain Growers.

As far as could be learned, there was no real difference from the original proposition considered.

There could not have been a more satisfactory conference.

## THE SUNDAY SCHOOL

Lesson V.—First Quarter, For  
Jan. 30, 1910.

## THE INTERNATIONAL SERIES.

Text of the Lesson, Matt. v. 17-28. 39—Memory Verse, 44—Golden Text, Matt. v. 48—Commentary Prepared by Rev. D. M. Stearns.

There are two prominent facts we must keep in mind in this lesson. The first is the history of salvation; salvation is of the Lord; salvation is of the Jews; known unto God are all His works from the beginning of the world. He worketh all things after the counsel of His own heart. The second is the salvation of the world. The world is still in the hands of God. All the ends of the earth shall see the salvation of our God and the whole earth be filled with His glory.

Preaching services and Sunday school at Neapolis School house every two weeks at eleven a.m. Everybody welcome.

## NEAPOLIS W. C. T. U. NOTES

The next regular meeting will be held at the home of Alice and Lennie Stuart, January 27. Temperance Sunday school work is the topic.

The Tobacco Habit. "Many boys seem to think it is manly; they wish to do as others do. It is not manly to imitate anyone. Do nothing because some one else does it. To do this is to be a slave to be led. And one feature of tobacco habit is that one makes himself a slave to a weed." Colton.

The last meeting was a very interesting. Several articles were read on Temperance in the Home. A paper "Progressive Temperance Teaching" was read by Mrs. Shaw.

## Blooming Prairie News

Mr. Orr has his shack finished on Sec. 16.

Mr. High and Mr. Orr got back from Calgary last week.

Many people are coming in now.

There is a fine trail down to theriver from To man.

Many loads of oats are being hauled across the river.

While coming up the Stoffer hill late in the evening of Mr. Nottlands' horses fell and the load nearly went over the bank. If it had not been for the good work done by the Stoffer Bros. fast fall it would have been a bad accident. The small ridge on the outside of the road saved the load.

Three Germans from range 16 stopped at P. O. over night Thursday.

\$1400 has been offered for a location on a homestead and preemption in this district. Wait till mosquito time and a whole lot will sell out for less than that.
